

SafeGuard

User Manual — Version 1.0

Overview

SafeGuard is a personal safety Android application for women, university students, and solo travellers in Pakistan. This manual explains how to install, set up, and use all features of the app.

System Requirements

Requirement	Details
Android Version	Android 8.0 (Oreo) or higher — API Level 26+
Internet	Required for Firebase, AI Assistant, and Maps
GPS / Location	Required for SOS and Location Sharing features
Storage	At least 50 MB free space
Microphone	Required for Audio Recording feature

Installation

Installing via APK file:

- Step 1: Download the APK file (app-debug.apk) from the repository.
- Step 2: Open Settings on your Android phone.
- Step 3: Go to Security (or Privacy) and enable 'Install from Unknown Sources'.
- Step 4: Locate the downloaded APK using a file manager and tap it.
- Step 5: Tap 'Install' and wait for installation to complete.
- Step 6: Open SafeGuard from your app drawer.

Getting Started

Registration

- Step 1: Open the app and tap 'Register'.
- Step 2: Enter your name, email address, and create a password.
- Step 3: Set a 4-digit PIN for quick app access.
- Step 4: Complete your profile — add personal and medical details.
- Step 5: Add trusted contacts (name + phone number) who will receive SOS alerts.

Login

- Step 1: Open the app and enter your registered email and password.
- Step 2: OR enter your 4-digit PIN for quick access.

Features Guide

SOS Alert

The SOS Alert feature sends an emergency SMS message containing your live GPS location (Google Maps link) to all saved trusted contacts with a single tap.

How to use: Tap the large red SOS button on the home screen. The app will immediately send SMS alerts to all your trusted contacts with your current location.

Note: SMS and Location permissions must be granted for this feature to work.

Location Sharing

Share your real-time GPS location with trusted contacts via SMS at any time.

How to use: Go to Location Sharing from the home screen and tap 'Share My Location'. An SMS with your Google Maps link will be sent to your trusted contacts.

Fake Call

Simulate an incoming phone call to help you escape an uncomfortable or unsafe situation.

How to use: Tap 'Fake Call' from the menu. Set a delay (e.g., 10 seconds) and the app will simulate a realistic incoming call on your screen.

Audio Recording

Record audio discreetly in the background. The recording is saved locally on your device.

How to use: Tap 'Audio Recording' and press Start. The recording runs in the background. Press Stop to save the file to your device storage.

Note: Microphone permission must be granted.

AI Safety Assistant

A chat-based AI assistant that provides safety guidance, emergency tips, and answers safety-related questions.

How to use: Tap 'AI Safety Assistant' and type your question or situation. The assistant will provide relevant safety advice.

Emergency Services

Directly call Pakistan emergency numbers with one tap.

Service	Number
Police	15
Rescue / Ambulance	1122
Highway Police	124

Smart Ride Sharing

Before getting into a vehicle, log the driver's name, vehicle number, and destination. This information is saved and can be shared with trusted contacts for your safety.

How to use: Tap 'Smart Ride', fill in the ride details, and tap 'Save & Share'.

Community Alert

Broadcast a safety message to your entire trusted contacts network at once.

How to use: Tap 'Community Alert', type your message, and tap 'Broadcast'. All trusted contacts will receive your message via SMS.

User Profile

Store your personal, medical, and professional information for quick access during emergencies.

How to use: Go to Profile from the menu and fill in your details including blood type, medical conditions, home address, and profession.

Troubleshooting

SOS not sending: Check that SMS permission is granted and mobile data/Wi-Fi is on.

Location not working: Enable GPS in phone settings and grant location permission to SafeGuard.

App not installing: Enable 'Install from Unknown Sources' in Security settings.

AI Assistant not responding: Check your internet connection.

Audio not recording: Grant microphone permission in App Settings.
